Fertilizer Research **45:** 235–237, 1996.

CONTENTS Volume 45 1996

Volume 45 No. 1

Comparison of the fertilizing effects of ash from burnt secondary vegetation and of mineral fertilizers on upland rice in south-west Côte d'Ivoire 1–11
H. Van Reuler, B.H. Janssen

Response of lowland rice and common bean grown in rotation to soil fertility levels on a Varzea soil 13–20
N.K. Fageria, V.C. Baligar

Use of chlorophyll meter for nitrogen management in lowland rice 21–24
I. Johnkutty, SP. Palaniappan

Influence of the concentrated pig slurry on soil and corn fodder yield and chemical composition in presence of N top dressing 25–29
E. Vasconcelos, F. Cabral

Effect of encapsulated calcium carbide and urea application methods on denitrification and N loss from flooded rice 31–36
D.G. Keerthisinghe, Lin Xin-Jian, Luo Qi-Xiang, A.R. Mosier

Effectiveness of Ecophos compared with single and coastal superphosphates 37–49
M.D.A. Bolland

The effect of Matongo rock phosphate and urea as compared to di-ammonium phosphate in the composting process and the yield of potatoes in the Mugamba region in Burundi 51–59
C.H. Van den Berghe

Effects of applied nitrogen on soil nitrate-nitrogen content after harvest of winter barley 61–67
I.R. Richards, P.A. Wallace, G.A. Paulson

Silicate rock powder: effect on selected chemical properties of a range of soils from Western Australia and on plant growth as assessed in a glasshouse experiment 69–79
P. Hinsinger, M.D.A. Bolland, R.J. Gilkes

Nitrite in soils: accumulation and role in the formation of gaseous N compounds 81–89
O. Van Cleemput, A.H. Samater

Volume 45 No. 2

Dynamics of phosphate in soils. An isotopic outlook 91–100
J.C. Fardeau

The role of isotopic techniques on the evaluation of the agronomic effectiveness of P fertilizers 101–110
J.C. Fardeau, G. Guiraud, C. Marol

Movement of bromide as a tracer for nitrate in an Alfisol of the Indian Semi-Arid Tropics under rainfed condition 111–116
A.K. Patra, T.J. Rego

A bivariate response surface for growth data 117–122
K.G. Dodds, A.G. Sinclair, J.D. Morrison

Nitrogen use efficiency of irrigated tropical rice established by broadcast wet-seeding and transplanting 123–134
S. Peng, F.V. Garcia, H.C. Gines, R.C. Laza, M.I. Samson, A.L. Sanico, R.M. Visperas, K.G. Cassman

Response of dryland wheat to supplemental irrigation and rate and method of N application 135–142
K.S. Sandhu, A.S. Sidhu

Granite powder as a source of potassium for plants: a glasshouse bioassay comparing two pasture species 143–152
C. Coroneos, P. Hinsinger, R.J. Gilkes

The effect of N, P and KCl fertilizers on grain yield and Cd concentration of malting barley 153–161
C.A. Grant, L.D. Bailey, M.C. Therrien

Selenium concentration in spring wheat as influenced by basal application and top dressing of selenium-enriched fertilizers 163–168
S. Tveitnes, B.R. Singh, L. Ruud

Volume 45 No. 3

Estimation of the contribution of biological N_2 fixation to two *Phaseolus vulgaris* genotypes using simulation of plant nitrogen uptake from ^{15}N-labelled soil 169–185
R.M. Boddey, S.H. Müller, B.J.R. Alves

Mussoorrie rock phosphate-pyrite mixture as phosphate fertilizer 187–192
S.N. Sharma, R. Prasad

The effect of ionic strength on soil P reactions is negligible 193–197
P.R. Ernani

European soils overfertilized with phosphorus: Part 1. Basic properties 199–207
E. Barberis, F. Ajmone Marsan, R. Scalenghe, A. Lammers, U. Schwertmann, A.C. Edwards, R. Maguire, M.J. Wilson, A. Delgado, J. Torrent

Effect of climate on the recovery in crop and soil of ^{15}N-labelled fertilizer applied to wheat 209–215
C.J. Pilbeam

A modified urea based NP fertilizer: urea-TSP-MAP combinations 217–220
M.X. Fan, A.F. MacKenzie, H.D. Blenkhorn

Estimating nutrient surplus and nutrient use efficiency from farm characteristics 221–233
J.W.A. Langeveld, G.B. Overbosch

Volume contents 235–237
Author index 238
Instructions to authors 239–240
